Oxford Cambridge and RSA
...day June 20XX - Morning/Afternoon
AS Level Physics A
H156/01 Breadth in physics

PRACTICE MARK SCHEME

## MAXIMUM MARK <br> 70

Version: Final
Last updated: 23/12/2015
(FOR OFFICE USE ONLY)

## MARKING INSTRUCTIONS

## PREPARATION FOR MARKING SCORIS

1. Make sure that you have accessed and completed the relevant training packages for on-screen marking: scoris assessor Online Training; OCR Essential Guide to Marking.
2. Make sure that you have read and understood the mark scheme and the question paper for this unit. These are posted on the RM Cambridge Assessment Support Portal http://www.rm.com/support/ca
3. Log-in to scoris and mark the 10 practice responses ("scripts") and the 10 standardisation responses

YOU MUST MARK 10 PRACTICE AND 10 STANDARDISATION RESPONSES BEFORE YOU CAN BE APPROVED TO MARK LIVE SCRIPTS

## MARKING

1. Mark strictly to the mark scheme
2. Marks awarded must relate directly to the marking criteria.
3. The schedule of dates is very important. It is essential that you meet the scoris $50 \%$ and $100 \%$ (traditional $40 \%$ Batch 1 and $100 \%$ Batch 2 ) deadlines. If you experience problems, you must contact your Team Leader (Supervisor) without delay.
4. If you are in any doubt about applying the mark scheme, consult your Team Leader by telephone or the scoris messaging system, or by email.
5. Work crossed out:
a. where a candidate crosses out an answer and provides an alternative response, the crossed out response is not marked and gains no marks
b. if a candidate crosses out an answer to a whole question and makes no second attempt, and if the inclusion of the answer does not cause a rubric infringement, the assessor should attempt to mark the crossed out answer and award marks appropriately.
6. Always check the pages (and additional objects if present) at the end of the response in case any answers have been continued there. If the candidate has continued an answer there then add a tick to confirm that the work has been seen.
7. There is a NR (No Response) option. Award NR (No Response)

- if there is nothing written at all in the answer space
- OR if there is a comment which does not in any way relate to the question (e.g. 'can't do', 'don't know')
- OR if there is a mark (e.g. a dash, a question mark) which isn't an attempt at the question

Note: Award 0 marks - for an attempt that earns no credit (including copying out the question)
8. The scoris comments box is used by your team leader to explain the marking of the practice responses. Please refer to these comments when checking your practice responses. Do not use the comments box for any other reason.
If you have any questions or comments for your team leader, use the phone, the scoris messaging system, or e-mail.
9. Assistant Examiners will send a brief report on the performance of candidates to your Team Leader (Supervisor) by the end of the marking period. The Assistant Examiner's Report Form (AERF) can be found on the RM Cambridge Assessment Support Portal (and for traditional marking it is in the Instructions for Examiners). Your report should contain notes on particular strength displayed as well as common errors or weaknesses. Constructive criticism of the question paper/mark scheme is also appreciated.
10. Annotations available in Scoris

| Annotation | Meaning |
| :--- | :--- |
| BOD | Benefit of doubt given |
| CON | Contradiction |
| ECF | Incorrect response |
| FT | Error carried forward |
| NAQ | Follow through |
| NBOD | Not answered question |
| POT | Benefit of doubt not given |
| A | Power of 10 error |
| RE | Omission mark |
| SF | Rounding error or repeated error |
| Error in number of significant figures |  |
| AE | Correct response |
| $\square$ | Arithmetic error |
| ? | Wrong physics or equation |

11. Abbreviations, annotations and conventions used in the detailed Mark Scheme (to include abbreviations and subject-specific conventions).

| Annotation | Meaning |
| :---: | :--- |
| (1) | alternative and acceptable answers for the same marking point |
| reject | Separates marking points |
| not | Answers which are not worthy of credit |
| IGNORE | Answers which are not worthy of credit |
| ALLOW | Answers that can be accepted |
| $\mathbf{( ~ )}$ | Words which are not essential to gain credit |
| ecf | Underlined words must be present in answer to score a mark |
| AW | Orror carried forward |
| ORA |  |

## SECTION A

| Question | Answer | Marks | Guidance |
| :---: | :---: | :---: | :---: |
| 1 | C | 1 |  |
| 2 | D | 1 |  |
| 3 | B | 1 |  |
| 4 | C | 1 |  |
| 5 | C | 1 |  |
| 6 | C | 1 |  |
| 7 | D | 1 |  |
| 8 | A | 1 |  |
| 9 | D | 1 |  |
| 10 | C | 1 |  |
| 11 | C | 1 |  |
| 12 | B | 1 |  |
| 13 | C | 1 |  |
| 14 | A | 1 |  |
| 15 | B | 1 |  |
| 17 | D | 1 |  |
| 18 | A | 1 |  |
| 19 | C | 1 |  |
| 20 | B | 1 |  |
|  | C | 1 |  |

## SECTION B

| Question |  |  | Answer |  | Marks | Guidance |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 21 | (a) |  | $\begin{aligned} & 3000 \times 9.8 \times 12 / 0.60 \\ & =588 \mathrm{~kJ} \end{aligned}$ |  | $\begin{aligned} & \text { C1 } \\ & \text { A1 } \end{aligned}$ |  |
|  | (b) | (i) | $(230 \pm 40) \mathrm{MPa}$ |  | B1 |  |
|  |  | (ii) | Stress $=1.1 \times 10^{6} /\left(\pi \times 0.045^{2}\right)=173 \mathrm{MPa}$ $173 \mathrm{MPa}<230 \mathrm{MPa}$ <br> So will not stretch too much in use Less chance of permanent deformation or fatigue |  | $\begin{aligned} & \text { C1 } \\ & \text { A1 } \\ & \text { B1 } \\ & \text { B1 } \\ & \hline \end{aligned}$ | AW (ecf) <br> Allow any sensible contextual suggestion |
|  |  |  |  | Total | 7 |  |

| 22 | (a) | GPE loss $=\mathrm{mgh}=0.60 \times 9.81 \times 0.050=0.29 \mathrm{~J}$ | A1 |  |
| :---: | :---: | :---: | :---: | :---: |
|  | (b) | $\begin{aligned} & \text { EPE }=1 / 2 F x=0.50 \times 5.88 \times 0.05 \\ & =0.147 \mathrm{~J} \\ & \left(\text { or } \mathrm{k}=\mathrm{F} / \mathrm{x}=5.88 / 0.050=118 \mathrm{~N} / \mathrm{m}, \text { EPE }=1 / 2 \mathrm{k} \mathrm{x}^{2}=1 / 2 \times 118 \times 0.050^{2}\right. \\ & =0.147 \mathrm{~J} \text { ) } \end{aligned}$ | $\begin{aligned} & \text { M1 } \\ & \text { A1 } \end{aligned}$ | Allow answers to 2 s.f. |
|  | (c) | GPE $\rightarrow$ EPE + KE (when falling) <br> $\mathrm{EPE} \rightarrow \mathrm{GPE}+\mathrm{KE}$ (when rising) <br> Some energy dissipated as heat as oscillates (because of air resistance / friction) | $\begin{aligned} & \text { B1 } \\ & \text { B1 } \\ & \text { B1 } \end{aligned}$ |  |
|  |  | Total | 6 |  |

| 23 | (a) |  | No sideways momentum before hits ground <br> Movement in opposite sideways directions needed to conserve <br> momentum | B1 <br> B1 | AW |
| :--- | :--- | :--- | :--- | :---: | :--- |
|  | (b) | (i)Transverse wave <br> Vibration in a fixed direction / plane | B1 <br> B1 | Full credit for clear, annotated diagram |  |
|  |  | (ii)Rotate polaroid <br> Look for dim / bright light <br> Alternating every $90^{\circ}$ | B1 <br> B1 |  |  |
|  |  |  | Total | $\mathbf{7}$ |  |

| Question |  | Answer | Marks | Guidance |  |
| :--- | :--- | :--- | :--- | :--- | :--- |
| 24 | (a) | Any 2: <br> Same mass / weight / sheet of paper <br> Same catapult angle / firing speed <br> Same height of catapult | B1 <br> Bin: $1.6 \mathrm{~s} ;$; max: 2.2 s | Credit any other sensible suggestion | (b) |

| $\mathbf{2 5}$ | (a) |  | Spread of several micrometer/Vernier calipers readings | B1 | Apparatus and method must be linked <br> Allow ruler and thickness of 20 samples |
| :--- | :--- | :--- | :--- | :---: | :--- |
|  | (b) | (i) | Manipulate $\mathrm{R}=\mathrm{V} / \mathrm{I}$ and $\mathrm{R}=\rho \mathrm{t} / \mathrm{L}^{2}$ <br> Rearrangement | M1 <br> M1 |  |
|  |  | (ii)$0.13 \times\left(25 \times 10^{-3}\right)^{2} / 32 \times 10^{-3} \times 0.60 \times 10^{-3}$ <br> $=4.2 \Omega \mathrm{~m}$ | C1 <br> A1 | Watch for attention to units |  |
|  | (c) | Relate current to energy transfer / temperature increase <br> More free electrons | B1 | AW |  |
|  |  |  | B1 |  |  |

| Question |  |  | Answer | Marks | Guidance |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 26 | (a) |  | Weight, drag, upthrust (correct direction and labelled) Correct relative length (upthrust must be longer than sum of other two forces) | $\begin{aligned} & \hline \text { B1 } \\ & \text { B1 } \end{aligned}$ |  |
|  | (b) | (i) | Any 3: <br> Initially accelerates / velocity increases <br> Initially upthrust > drag + weight <br> Drag increases (as speeds up) <br> Then constant velocity / no acceleration <br> Forces balanced $/$ resultant force $=0 /$ upthrust $=$ drag + weight | $\begin{aligned} & \text { B1 } \\ & \text { B1 } \\ & \text { B1 } \end{aligned}$ |  |
|  |  | (ii) | $\begin{aligned} & \text { Tangent / gradient near t }=0 \mathrm{~s} \\ & \text { e.g. } 0.004 \mathrm{~m} \mathrm{~s}^{-1} / 0.25 \mathrm{~s}=0.016 \mathrm{~m} \mathrm{~s}^{-2} \end{aligned}$ | $\begin{aligned} & \hline \text { M1 } \\ & \text { A1 } \end{aligned}$ | only penalise one mark for unit error |
|  |  | (iii) | $\begin{aligned} & \text { net } F=6.7 \times 10^{-9} \times 0.016=1.072 \times 10^{-10} \mathrm{~N} \\ & U=\text { net } F+W=6.6 \times 10^{-8} \mathrm{~N} \end{aligned}$ | $\begin{aligned} & \text { C1 } \\ & \text { A1 } \end{aligned}$ |  |
|  |  |  | Total | 9 |  |

| 27 | Quieter than average (and/or louder) <br> Regions of destructive interference (and/or constructive interference) <br> Calculation of fringe spacing ( $\mathrm{x}=330 \times 30 /(1200 \times 5.0)=1.65 \mathrm{~m})$ <br> Effect is less noticeable further from the centre owing to different <br> amplitudes received from each speaker | B1 | AW |
| :--- | :--- | :--- | :---: | :---: |
|  |  | B1 |  |
